

June 8, 2013

It appears that the Family Church already operates a day care. The flow of traffic indicates a school or daycare. The same vehicles including a Sheriff Deputy car goes in and out almost daily. During regularly scheduled services on Wednesdays, Saturday night and Sundays the traffic makes it near impossible to get in or out of our driveway. I might ask why subdivisions etc. are required to provide turning lanes when they are expected to create a traffic problem and this church was not. I would also like to know why they are allowed to have their Church sign and activities signs on GRU right of way. Not only their regular sign but just as they did today they erect other large signs on the right of way advertising misc. activities. Other Churches along this street have their signs back on their own property. Why are exceptions made for this Church? We have lived here over 40 years and paid taxes, they DO NOT as a non profit. However I fail to see why churches can run a for profit daycare and be non profit. We do not need more noise or traffic in the area. Not only do I think the request for a daycare should be rejected but determine the status of the current activities and stop the continual use of the GRU right of way.
